

Wi-Fi Assistive Listening System Instructions

ONE TIME BEFORE ANYTHING ELSE

Go to the app store and download the "[Listen Everywhere](#)" app (app is called ListenWIFI) to your smartphone. Available for Android and iOS devices.

AFTER THE APP IS INSTALLED, FOLLOW THESE INSTRUCTIONS

1. Verify that Bluetooth hearing aids are connected to your device and working properly.
2. Connect to the "ASSISTIVE LISTENING" Wi-Fi network, available in the sanctuary. The password when connecting is "nardinpark" - all lower case, no spaces.
 - a. Note that this network does not have internet access, so once connected users will not be able to access the app store or the internet.
3. Once connected, load the Listen Everywhere app.
4. The app will load and perform a venue scan to find available audio channels. One channel will display - select it to listen. A brief welcome screen/video may play first but can be skipped by pressing skip ad at the top right.
5. The audio will load and start playing automatically. The volume of the audio can be adjusted using the physical buttons on your device.

Please ask a neighbor in your pew for assistance if needed. We are thankful you are here and want to make sure this is a meaningful worship experience for everyone.
